

## **DECLARATION OF COMPLIANCE WITH THE REACH REGULATION Pursuant to Article 33 of Regulation (EC) No. 1907/2006 for Articles**

**Subject:** REACH Compliance Declaration for Manufactured or Marketed Products

In accordance with Article 33 of Regulation (EC) No. 1907/2006 (REACH), we inform you that, as of today, some of our articles may contain substances identified as "Substances of Very High Concern" (SVHC), listed in the Candidate List published by ECHA.

In our articles, the only detected SVHC is lead (CAS 7439-92-1, EC 231-100-4), which is present in the brass alloys used in specific components.

Products containing lead in a percentage higher than 0.1% by weight in the brass component are listed in the attachment (Excel or PDF table). The lead content generally varies between 2.5% and 3.5% by weight in the metal alloy.

Pursuant to Article 33 of REACH, we are required to inform about the presence of the aforementioned SVHC.

These articles are not subject to the restrictions of Annex XVII of REACH, provided they are not intended for uses involving ingestion or frequent oral contact.

The lead is stably bound within the brass matrix.

During normal or reasonably foreseeable use, our articles do not pose significant risks of lead exposure.

For the end-of-life disposal phase, we recommend avoiding mechanical processes (such as cutting or drilling) that could generate metal dust or release it into the environment.

We also declare that none of our articles are designed to intentionally release substances during use.

We remain at your disposal for any further clarification.

Kind regards,

Settimo Torinese, 2025/16/04
